Empowering Your Homes with Innovative Technology

Who We Are

At Darke AV, we specialize in creating custom audiovisual solutions that will take your home, yacht or commercial building to the next level. Our team of experts has years of experience and is dedicated to providing you with the best service possible. Explore our range of services and let us help you create the perfect ambiance for your space.

Residential Audiovisual

Upgrade your living space with our exceptional Residential Audiovisual services. Our team of experts will come to your home and work closely with you to provide a proposal that suits your needs and desires. From sound systems to lighting design, we'll help create an atmosphere that elevates your home entertainment experience and reflects your personal style.

Commercial Audiovisual

Upgrade your living space with our exceptional Audiovisual services. Our team of experts will come to your commercial building and work closely with you to provide a proposal that suits your needs and desires. From sound systems to lighting design, we'll help create an atmosphere that elevates your commercial buildings entertainment experience and reflects your personal style.

Marine Audiovisual

Upgrade your living space with our exceptional Yacht Audiovisual services. Our team of experts will come onto your Marine and work closely with you to provide a proposal that suits your needs and desires. From sound systems to lighting design, we'll help create an atmosphere that elevates your yacht entertainment experience and reflects your personal style.

CEDIA™ MEMBER

NORTH LONDON SMART HOME

BACKGROUND

This project was a full-scale integration of luxury technology designed to enhance both lifestyle and aesthetics. Working closely with the client, our goal was to deliver a seamless experience that complemented their home and its unique features.

CONTROL4

The client chose a Control4 system to be the main overriding control system of their new home, programmed to integrate with all systems including Lighting, Multi-Room Audio, 4K UHD Video distribution, Window Treatments, Security, Under Floor Heating as well as AC control.

LUTRON LIGHTING

At the heart of the design is a Lutron lighting control system, carefully designed and programmed to showcase the client's extensive art collection. Every scene was designed to balance atmosphere with functionality, allowing the art to be illuminated perfectly at any time of day.

AV DISTRIBUTION

Discreet yet powerful multi-room audio was achieved with Sonance IS10 invisible speakers, delivering exceptional sound throughout the home while maintaining clean architectural lines. For video, we implemented a 4K UHD distribution system, ensuring flawless picture quality across multiple rooms with effortless control.

HOME CINEMA

One of the standout features of the project is the dedicated basement cinema, designed to host up to 12 people in comfort. The space was engineered for both performance and immersion, with tailored seating and high-end audiovisual systems providing the ultimate private cinema experience, a JVC UHD Laser projector accompanied by Paradigm Audio Pro series speakers gives a 9.2.4 Dolby Atmos audio experience.

SUMMARY

This project is a true example of technology and design working in harmony, enriching everyday living while respecting the elegance of the client's home.

CLIENT'S TESTIMONIAL

"We loved what the team at Darke AV did in our house. The whole home internet system works really well, the lighting is fabulous, the TV set up is tailored to our needs and our cinema room is sensational. Everyone at Darke AV have been a joy to work with and the ongoing support is exceptional"
